ELECTRIC FAN HEATER USE AND CARE GUIDE

When using electrical appliance, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

IMPORTANT SAFEGUARDS

1. Read all instructions before using this appliance.
2. The appliance is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. If provided, use handles when moving this appliance. Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains at least 3 feet from the front of the appliance and keep them away from the sides and rear.
3. Extreme caution is necessary when any heater us used by or near children or invalids and whenever the heater is left operating and unattended.
4. Always unplug heater when not in use, before putting on or taking off parts and before cleaning. Allow to cool before handling.
5. Do not operate the appliance with a damaged cord or plug or after the appliance malfunctions, has been dropped or damaged in any manner. Return appliance to authorized service facility for examination, electrical or mechanical adjustment or repair.
6. Do not use outdoors or for commercial purpose.
7. This appliance is not intended or use in bathrooms, laundry areas and similar indoor locations.
   Never locate the appliance where it may fall into a bathtub or other water container.
8. Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Arrange cord away from traffic area and where it will not be tripped over.
9. To disconnect the appliance, turn controls to off, then remove plug from outlet.
10. Check if the electrical voltage of the main supply and the load of the socket match the rated voltage and power marked on the rating label of the appliance.
11. Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock or fire, or damage the heater.
12. To prevent a possible fire, do not block air intake or exhaust in any manner. Do not use on soft surfaces, like a bed. Where openings may become blocked.
13. The appliance has not and arcing or sparking parts insides. Do not use it in areas where gasoline, paint, or flammable liquids are used or stored.
14. Use the appliance only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock or injury to persons.
15. Always plug heaters directly into a wall outlet/receptacle. Never use with an extension cord or relocatable power tap (outlet/power strip).
16. To protect against risk of electrical shock, do not put the appliance, cord, plug, or the heating element in water or other liquid. This may cause personal injury and / or damage to the product.
17. The use of accessory attachments not recommended by the appliance manufacturer may result in fire, electric shock or injury to persons.
18. Do not let cord hang over edge of table or counter or touch hot surface, including the stove.
19. Do not place the appliance on or near a hot gas or electric burner or in a heated oven or near a fire.
20. Do not use the appliance for other than intended use.

21. Do not use the device with wet or moist hands.
22. Where appliance, always attach plug to appliance and check that the controls is “0” before plugging cord into all outlet.
23. Check if the socket and the plug are undamaged and put the plug well in the socket.
24. Put the appliance on a stable and flat surface for no risk of falling down.
25. Be sure that there is enough space for the fan heater while operating, at least 90cm (3.5ft) around the appliance, and right before the air outlet, the distance should be at least 120cm(5ft).
26. Do not cover the fan heater at any time when operating.
27. Do not hang it on the wall.
28. Do not use it on the carpet with long fluff.
29. Do not put the appliance immediately below a electric socket.
30. Keep flammable and explosive objects away from the heater.
31. In case of malfunction or abnormal operation, do not attempt to open or repair the appliance at home, send the heater to appointed service agent for inspection and repair.
32. If the power cord is damaged, it must be replaced by the appointed service agent or a similarly qualified person.

OPERATION INSTRUCTION

1. Turn the thermostat switch to the minimal value, at the same time turn the heat select switch to the “O” position (see picture).
2. Plug in the appliance, and turn the thermostat switch to the maximum position. Then turn the heat select switch to choose air or warm air and the temperature of warm air as below. While working the indicator light will be on.
   2.1 Turn the heat select switch to “+” position, the heater blows cool air.
   2.2 Turn the heat select switch to “I” position, the heater blows warm air, working at 750W.
   2.3 Turn the heat select switch to “II” position, the heater blows warm air, working at 1500W.
   2.4 Turn the heat select switch to “O” position, the heater stops working, the indicator light will be off.
3. Adjust the thermostat switch to suitable position for desired temperature setting.
   3.1 Check if the thermostat switch is on the maximum position.
   3.2 When you feel the room temperature comfortable, turn the thermostat switch anti-clockwise slowly to the minimal position until the appliance stops working.
   3.3 Then the thermostat switch will keep the room temperature at the desired temperature automatically.
   3.4 You can also turn the thermostat switch anti-clockwise to the minimum position or turn the thermostat switch clockwise to maximum position to make the temperature lower or higher.
   3.5 When working, press the oscillation button to “-”, the appliance will be oscillation, when press the button to “O”, the appliance will stop oscillation.

Security System

To avoid risk to human being or damage to internal components, the fan heater has a security system which will automatically switch off the appliance if the heat reaches the safety limit. If overheating occurs:
   1.1 Turn the heat select switch to “O” position, turn the thermostat switch to the minimal position and remove the plug from the socket.
   1.2 Check if the air flows smoothly before the outlet and inlet, and if the appliance is put in right
position. If so, get it in order before restart the appliance.
1.3 Let the fan heater cool down for 8 to 10 minutes before you start it again.
1.4 Plug in the appliance and switch it on. If the appliance can’t operate normally, remove the plug immediately from the socket and have the fan heater serviced by an appointed service only.

SAFETY TIP-OVER SWITCH: This unit is equipped with a Safety Tip-Over switch located inside the Heater. This feature cuts the main power to the unit if the Heater gets knocked over. If the unit does tip over, simply stand it up right to resume operation.

MAINTENANCE AND CLEANING
1. Before you turn off the appliance, turn the heat select switch to the \( \theta \) position. After operating for 3-5 minutes to lower the internal temperature of appliance, then turn the heat select switch to “O” position.
2. Clean the air inlet and sir outlet of the appliance regularly (at least twice a year normally)
3. Before you clean the appliance, turn off the heater first and then remove the plug from the socket, and wait until the appliance cools down.
4. Use a damp cloth to clean the surface of appliance, avoid water going inside the appliance dry the appliance before use or store.

WARRANTY
This unit is warranted against defective materials or workmanship for one year from the date of purchase (warranty is only valid with a dated proof of purchase). The warranty is valid for any manufacturing defects only. This warranty covers operational defects incurred in normal use and does not apply in the case of damage, abuse, mishandling, accident, or failure to follow operation instructions. During the one year warranty period, a product with a defect will be either repaired or replaced with a reconditioned comparable model (at our option). Any return of defective merchandise to the manufacturer must be processed accordingly by contacting customer service first to obtain the Return Authorization Number and freight prepaid with proof of purchase. We will not accept any returns of merchandise without an applicable RMA#.
